

In anticipation of the 2021-2022 school year, we would like to gauge the interest of our families regarding the continued need of a district level cyber option. We ask that each family, regardless of your current child's learning mode, complete this survey by April 9, 2021.

The purpose of this survey is to determine how many families would like to have their children attend our district level cyber option for the 2021-2022 school year. While we may not know what the pandemic may still have in store for us as we move forward, we know that we will have a district cyber option for all students wishing to remain virtual for the 2021-2022 school year. By requesting this information now, we can begin to plan for instruction and staffing needs based upon the needs of our families.

Please review your student's current grades and other academic data. If he or she is currently struggling in the virtual setting, please consider sending them to the physical school building for next year. While the cyber model may be working well for some of our students, we know that for others, the in-person instruction is most beneficial and we would want that to be a consideration for our families as we plan and prepare.

When our scheduling process begins, if you indicate full cyber through our program for your student's instruction, a follow-up email will be sent to you.

Please click on this this link to access the survey. [21-22 SSD Scheduling Survey](#)

Please complete one survey for each child in your family who will be attending school in 2021-2022.

Thank you in advance for your assistance and support!
